DIRECTOR'S BIOGRAPHY / STATEMENT

From my journey as an at-risk youth bouncing around from the streets of Los Angeles to juvenile institutions, to attending the top film school in the world at the University of Southern California and becoming a Warner Bros. Fellow, I've learned that not only is overcoming adversity possible, but "success leaves clues."

In extensively researching what made Muhammad Ali "The Greatest," I set out to discover the blueprint he left behind — crafting a film that can serve as a path for those who are still oppressed, institutionally or mentally, to find the freedom they seek in realizing their own greatness.

While I utilize advanced AI tools to bring the rich visuals of my script to life, all the research, scriptwriting, and historical analysis in my films is 100% non-AI-assisted — helping me separate fact from the many fabricated accounts that have developed around Ali's life story over the years.

This motion picture is crafted for educational purposes. So, in other words, "I do it for the culture."
